UNITED STATES CELLULAR CORPORATION
QUARTERLY E911 IMPLEMENTATION REPORT

United States Cellular Corporation ("USCC"), by its undersigned attorneys,
hereby submits its quarterly E911 implementation report pursuant to the Commission's order
staying certain E911 phase II deadlines for many non-nationwide wireless carriers.¹

I. Introduction

USCC is a Tier II carrier under the *Order to Stay* issued by the Commission in 2002.² As a wireless carrier with systems serving many small and rural markets, USCC faces particular challenges in upgrading its technology and interacting with a wide variety of PSAPs across its service area. To meet these challenges, USCC continues to dedicate substantial financial and personnel resources to accelerate the deployment of E911 service throughout its service area. USCC personnel maintain regular communication with PSAPs that are at varying levels of readiness in the provision of E911 service to ensure prompt roll-outs once the PSAPs

¹ See *Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadlines for Non-Nationwide CMRS Carriers*, Order to Stay, 17 FCC Rcd. 14841 (2002) ("Order to Stay"); see also *Request for Limited Waiver of United States Cellular Corporation*, 22 FCC Rcd. 360, 368-69 (2007).

List ABCDE

are upgraded to receive and utilize either phase I or phase II E911 information. In addition, USCC closely monitors its E911 vendors to facilitate E911 deployment to all requesting PSAPs.

USCC continues to make great progress toward the provision of E911 service throughout its service area. In 2004, USCC completed an ambitious, four-year, multimillion dollar CDMA overbuild in all of its TDMA markets, an upgrade that enabled it to deploy a phase II compliant handset solution in cooperation with upgraded PSAPs that requested the service. USCC's cooperative phase II deployment effort employed during its CDMA conversion effectively became the standard utilized by the FCC in considering the phase II waiver requests filed by Tier III carriers proposing a conversion from TDMA to CDMA.³

II. Status of Phase I Requests

USCC and its E911 vendor, Intrado, actively work with all requesting PSAPs to deploy phase I E911 service throughout USCC's service area. In numerous cases, USCC has proceeded with deployment despite the fact that a particular PSAP request does not amount to a valid request for service under the Commission's rules, including in some markets where the PSAP has made only an oral request. In addition, in USCC's newly-acquired markets, USCC has proceeded with phase I or phase II roll-out to the entire market despite the fact that in some cases USCC received no formal request from a particular PSAP within that market.

To date, USCC has received 1051 requests for phase I service. USCC has successfully deployed phase I service to 1025 PSAPs, representing an additional 28 phase I deployments in this quarter and an overall phase I deployment rate of over 97 percent. Of the

² *Order to Stay*, ¶ 23.

³ *See Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems; E911 Phase II Compliance Deadlines for Tier III Carriers Order*,

remaining 26 outstanding phase I requests, 14 have been pending less than six months. Attached as Appendix A is a spreadsheet identifying those PSAPs requesting phase I service and the markets in which USCC has deployed phase I.

USCC has 12 PSAP requests for phase I service that have been pending for more than six months. For all of these outstanding requests, USCC has reached an agreement with the PSAP regarding a new target date for the deployment of phase I service. In these markets with delayed phase I deployments, the cause for the delay has been beyond USCC's control. In some instances, PSAPs have encountered delays in converting from a standalone ALI database to the LEC's database or have experienced problems with the trunks provided by the LEC to the selective router. In other cases, lack of funding at the PSAP has resulted in an inability of the PSAP to upgrade its equipment. USCC, with the assistance of Intrado, maintains regular contact with PSAPs in all of these markets and typically is ready to begin drive testing as soon as the PSAP is ready to deploy phase I.

III. Status of Phase II Requests

USCC continues to deploy phase II E911 service in accordance with the Commission's rules and the *Order to Stay*. To date, USCC has received 850 PSAP requests for phase II service. USCC has successfully deployed phase II E911 service to 806 PSAPs in its service area, representing an additional 62 PSAPs receiving phase II service from USCC since the previous quarter and an overall phase II deployment rate of almost 95 percent. USCC currently has 44 outstanding PSAP requests for phase II service, of which 30 have been pending

20 FCC Rcd. 7709 at ¶¶ 12-14, 16-17, 28-31 (2005).

less than six months. The attached spreadsheet identifies those PSAPs requesting phase II service and the markets where USCC has deployed phase II service.

USCC has 14 phase II requests that have been pending more than six months. In each of the markets where phase II deployment has been delayed, USCC has obtained an agreement from the requesting PSAP to postpone the phase II roll-out deadline until a date certain or until 30 or 60 days after the PSAP is ready and able to utilize the phase II information. USCC and its vendors have completed all the necessary steps toward phase II deployment in each case and are waiting for the PSAPs to make the necessary corrections to and/or upgrade their systems. For example, one PSAP has experienced delays as a result of lack of funding to purchase upgraded hardware and software for its equipment. Another PSAP has experienced delays as a result of LEC issues involving the selective router and software upgrades. Other PSAPs do not have the proper equipment to receive and utilize phase II information.

USCC continues to work with Intrado to do the necessary calibration, accuracy and drive testing to ensure that USCC's phase II service meets the Commission's accuracy requirements. Intrado conducts testing on USCC's CDMA switches that are serving PSAPs with live phase II deployments. These tests are conducted using the CDMA location-capable mobile phones currently available to USCC's customers. Intrado's accuracy test results confirm that USCC is meeting the Commission's requirement that 67 percent of the calls are accurate to within 50 meters and 95 percent of the calls are accurate to within 150 meters.⁴ Intrado typically performs a complete accuracy test every six months on each USCC switch with deployed phase II service. USCC also contracts for the provision of regular updates to the Base Station Almanac

⁴ See 47 C.F.R. § 20.18(h).

("BSA") for all of its cell sites serving CDMA markets where it has received a phase II request. The BSA improves the accuracy of location information provided to PSAPs.

IV. Status of Handset Deployment

USCC is compliant with the Commission's May 31, 2004 deployment benchmark that 100 percent of new activations be GPS-enabled handsets.⁵ In addition, USCC is compliant with the Commission's requirement that 95 percent of all handsets in use on its network are GPS-capable.⁶

USCC currently has the following GPS-enabled handsets available for sale in its CDMA markets: Samsung A870, Samsung u340, Samsung u520, Samsung r500, Samsung r610, LG UX245, LG UX355, LG UX380, LG UX145 Black, LG UX145 Pink, LG UX3300 "Prepaid wireless," Kyocera K312 "Thunder Lighting," Kyocera KX21 Strobe, Motorola M800 Bag phone, Motorola W385, Motorola V3M Silver Razr, Motorola V3M Red Razr, Motorola V3M Fire Red Razr, Motorola K1M KRZR, Motorola K1M Product Red KRZR, Motorola Motorokr Z6m, Motorola Motorazr(2) V9m, Motorola Q, RIM 8703e, RIM 7130, and RIM 8830. USCC no longer places any purchase orders for non-E911 capable CDMA handsets nor does it restock non-E911 capable CDMA handsets sold at USCC's retail locations.

⁵ See *Order to Stay* ¶ 27.

⁶ See 47 C.F.R. § 20.18(g)(v).

V. Conclusion

As demonstrated above, USCC continues to make significant progress in deploying E911 phase I and phase II service throughout its service area. The commitment of significant financial and personnel resources has enabled USCC to move closer to its goal of meeting or exceeding the Commission's implementation deadlines for E911 deployment.

Respectfully submitted,
